

Resolution in Support of the National Infrastructure Bank HM3339  
March 2022

The Board of Directors and members of Indivisible Albuquerque stand in support of HM 3339, National Infrastructure Bank Act of 2021 as introduced into the 117th Congress to facilitate efficient investments and the financing of infrastructure projects which will result in new job creation and other economic improvements in the United States.

We believe a National Infrastructure Bank will facilitate infrastructure improvements throughout the United States with an emphasis on roads, bridges, broadband access, renewable energy, water security, and other valuable projects. Such a bank will require no new taxes, be freed from Congressional gridlock and fund loans to governments and municipalities for designated infrastructure projects. A National Infrastructure Bank is such a benefit to the economy it can also help keep inflation in check.

We further believe that the job creation, economic growth and investment in our local communities will improve:

- our collective public health through the reduction of greenhouse gasses,
- investments in areas of high unemployment and disadvantaged communities and
- investments to secure public safety and resiliency.

We resolve to support actions in New Mexico to further the implementation of a National Infrastructure Bank.

Signed,

Board of Directors, Indivisible Albuquerque,
